Tiro vertical

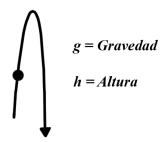

$$V_f = V_O + gt$$

$$h = V_0 t + \frac{gt^2}{2}$$

$$V_f^2 = V_0^2 + 2gh$$

En tiro vertical con $V_0 \neq 0$

$$h = (\frac{V_f + V_0}{2})t$$

 V_f = Velocidad final

V₀ = Velocidad inicial

g = Gravedad

t = Tiempo

h = Altura
